### SCREW INFORMATION

Each railing is unique to us at Räckesbutiken. In order to create the best possible attachment for your railing, we do not use a universal screw, but choose the one that fits your railing best.

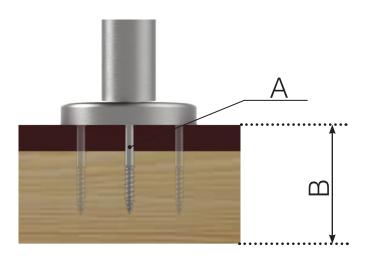

When you configure your railing, we select which screw fits best and then send the screw and accessories to you.

To see which screw your railing has, click on to overview in the configurator and look below "Screw".

Below you can see which screws we use and which may be relevant for your railing.

# SCREW FOR WOOD

### SCREW INFORMATION

SKRWAF8X80

SKRWAF8X120

Dimensions (A) : 8x80mm Minimum attachment depth (B): 100 mm Minimum distance from edge (C): 25 mm Bit: Torx 40

Dimensions (A) : 8x120mm Minimum attachment depth (B): 140 mm Minimum distance from edge (C): 25 mm Bit: Torx 40

#### SKRHEX8X75

Dimensions (A): 8x80mm Minimum attachment depth (B): 90 mm Minimum distance from edge (C) : 25 mm Bit: Socket wrench 13 mm SKRHEX8X100

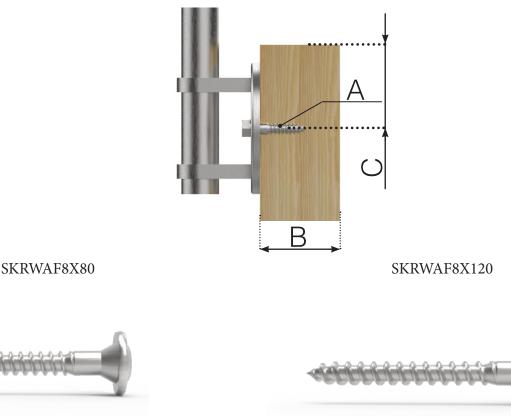

Dimensions (A): 8x80mm Minimum attachment depth (B): 115 mm Minimum distance from edge (C): 25 mm Bit: Socket wrench 13 mm
